

# History

## **1964**

Company founded by Alfred Remmele on the edge of Ochsenhausen, Germany, in his own garage (acquisition of tubular films and finishing).

## **1969**

Move to the monastery in Ochsenhausen to provide the necessary room height for the extrusion machine developed in-house.

## **1972**

Südpack grows through the cheese business. Cheese maturing in film was the secret. The fermentation gases can escape. To this day, Südpack remains the specialist in cheese maturing bags.

## **1975**

The first laminating machine is brought into operation. The most modern laminating processes guarantee compound films with consistent quality.

## **1977**

By acquiring the first Flexo printing machine, printing became one of the core competencies. Printing films of various thicknesses up to rigid films is possible.

## **1978**

The first foreign location in Great Britain is opened. The Südpack Group currently has 22 branches and locations.

## **1979**

Südpack Export AG is founded in Switzerland.

## **1980**

Sales volume rises for the first time since founding the company to DM 28.1m.

## **1981**

The first 5-layer co-extrusion machine is put into operation in Ochsenhausen.

## **1985**

Sales volume rises for the first time since founding the company to DM 56.2m, thus doubling within 5 years!

## **1988**

The Ecoform subsidiary (production of rigid films) is founded in Ochsenhausen.

## **1989**

The entry into the medical market (CDP) creates another milestone in the success story of the Südpack group.

## **1994**

The Group is certified to ISO 9001.

## **1999**

Business process modelling is completed after intensive preparation and SAP R/3 implemented.

## **2001**

A new dimension in printing begins: up to 12 colours in rotogravure printing and 10 colours in flexo-print.

## **2002**

Piciotti in Switzerland is taken over and today is part of the Südpack Group under the name of Südpack Bioggio.

## **2003**

Non-stop innovation keeps the Südpack success story going: Certification to BRC/IOP and ISO 9001:2000

## **2004**

40 years of Südpack – we live packaging. The specialist for packaging solutions and a competent system partner has every reason to celebrate!

## **2005**

The new APET machine goes into operation

**2006**

We know what the customer wants! In our new research centre, we have a large selection of all current packaging machines available. Together with our customers, we develop packaging solutions under production conditions. Further information can be found [here](#).

**2007**

We have set our sights high: with our new blown film machine, we manage 7 (layers) at once.
