

## Press release

### **SÜDPACK and SN Maschinenbau at PACK EXPO in Chicago**

**At this year's PACK EXPO INTERNATIONAL in Chicago, SÜDPACK USA will be taking part at two booths. At the company's own booth S-4137, the film manufacturer will be presenting its complete portfolio of high-performance films for packaging food, medical goods and industrial products as well as its range of solutions in the field of technical films. Together with SN Maschinenbau at booth S-3866, SÜDPACK will also be presenting a recyclable PurePE film for the production of pouches.**

The innovative and sustainable pouch packaging concept PurePE will be showcased on the FM 060 packaging machine. The intermittently operating rotary machine impresses with its reliable SN technology and stands for top performance, maximum flexibility and excellent packaging quality. The machine can produce three-side and four-side sealed pouches, bottom-gusseted pouches, Doypacks and Deltapacks as well as contour and membrane pouches. The pouches are filled with products of varied consistency – such as beef jerky, dried sausages, grated cheese, spices, nuts, snacks, dry pet food or non-food products – using the appropriate dosing devices.

The SÜDPACK packaging concept is based on the polymer PE, which is classified in many countries as recyclable and is therefore of interest to customers that operate internationally. Just like all SÜDPACK films, it is possible to equip the mono-material with different features based on the product to be packaged in order to ensure optimal product protection.

A further advantage of the PE-based packaging concept is the availability of compatible PE-based zipper systems on the market. As a result, the concept can be assessed as a true single-material solution and introduced into the appropriate recyclable material cycles. The zipper systems can be easily and reliably integrated

into the flat pouches or Doypacks, making it convenient for consumers to open and reseal the package.

The fact that the recyclable monofilm can easily be processed on standard machines will be impressively demonstrated at the SN Maschinenbau booth. Thanks to secure sealing and a large processing window, efficient packaging and rapid cycles are ensured on the high-performance FM 060.

#### **About SÜDPACK**

SÜDPACK is a leading manufacturer of high-performance films and packaging materials for the food, non-food, and medical product industries. Our solutions ensure maximum product protection as well as additional pioneering features with minimum material input.

The family business, which was founded by Alfred Remmele in 1964, is headquartered in Ochsenhausen. The production sites in Germany, France, Poland, Switzerland, the Netherlands and the USA are equipped with the latest plant technology and manufacture to the highest standards, including the capacity to operate under clean room conditions. The global sales and service network ensures a high degree of proximity to the customer and comprehensive application technology support in more than 70 countries.

With its state-of-the-art Development and Application Center at its headquarters in Ochsenhausen, the innovation-oriented company offers its customers an optimal platform for carrying out application tests and for developing individual and tailor-made solutions.

SÜDPACK is committed to sustainable development and fulfills its responsibility as an employer and towards society, the environment, and its customers by developing packaging solutions that are highly efficient and sustainable.
